

SMALL BUSINESS COMPETITIVE

	COMPETITOR	COMPETITOR	COMPETITOR
SUMMARY describe what you already know your competitor	NatureUnlockApp. Requires users to go outside, take a picture of a plant and upload it for verification before it unlocks the phone for app usage again.	Barrier: Requires a short 30 second wait to open apps, and locks them after brief periods of use (e.g. 10 minutes)	Forest: Pomodoro type app where you plant a virtual seed in-app and set a timer for its growth (10 minutes - 2 hours). Staying out of blacklisted apps allows the tree to grow. Works with Trees for the Future charity to plant real trees when users spend virtual coins in-app

Now do the research to add more detail to the following

TARGET CUSTOMER	Individuals looking to reduce screen time, break their social media addiction and improve mental wellness through minimising digital habits.	Adults who want to use their phone less and limit distractions that eat into their free time.	Interested in Science and Education. Students looking to study uninterrupted. Ages cited as between 18 -44 year old. (Similarweb, 2026)
PRODUCT OR PRICING	Free with several in-app purchases and subscription models.	Free but uses ads as a 30 second blocker to deter users from using their screen.	Basic version is free with ads. Subscriptions or one-time purchase for Pro version available.
GENERAL MARKETIN STRATEGY	Marketed as a hollistic health app, with multiple methods for maintaining good health through mindfulness. Descriptive call to action for users with relevant pain points (Apple, 2026)	Marketed as a "digital wellness assistant" meant to empower the user to "take back control" over their social media use.	Simple engaging product that offers gamification of use of time and social incentives with real-world environmental impact.
ONLINE MARKETIN STRATEGY	Website www.natureunlock.app with explanation and screenshots of features. Essentially a larger listing advert but with its own space & domain.	Just a listing on the Apple Store, helpful description of features and benefits. Descriptive instructional screenshots.	Word of mouth and virtual rewards. The project created an online community on Reddit to gain traction in the competition they offer and to retain users. (Medium, 2026)
STRENGTH	Many features: Meditation mode, breathing exercises for stress. Hollistic health app alongside unique and powerful screen time reduction feature.	Immediate effects, non-intrusive interruptions create deterrents to encourage the user to do other things.	Impactful Simple engaging design/brand Gamification/useable
WEAKNESSE	Too many features (e.g. Sounds for deep relaxation) could dilute product's main purpose. App unlock feature requires going outside to photograph nature - not always feasible.	Only offers this feature of blocking apps. No website for the application explaining it in detail or bringing in interest. Only available on iOS.	Paid tier might limit adoption, they have a 50% bounce rate (webvetted, 2026) but with 650k user visits per month.
COMPETITIV ADVANTAG	Our app allows the user to contribute/connect to the outdoors passively, without as much effort. Our product has more concise, uncomplicated goals.	Ours gamifies screen time reduction, encouraging the user to compete with themselves in reducing their screen time. Gives rich data insights into their habits. Offers real-world impact too.	Ours is free. Plants trees locally instead of abroad so requires less logistics. Doesn't require an account or virtual currency to plant trees. Ours is simple and effective.
